ABOUT ME

I am a Freelance Web Developer and System Developer dedicated to helping businesses, organizations, and entrepreneurs streamline their operations through innovative and customized software solutions. With experience in developing web-based applications, management systems, and business automation tools, I create scalable, secure, and user-friendly systems tailored to meet specific business requirements.

My expertise covers the full software development lifecycle, from requirements analysis and system design to development, testing, deployment, and maintenance. I focus on building solutions that improve efficiency, reduce manual work, enhance data management, and support business growth.

A dedicated and hardworking individual with a strong commitment to excellence and continuous learning. Known for being reliable, adaptable, and a team player, I take pride in delivering quality results in any task. Passionate about personal and professional growth, I am always eager to learn new skills and contribute positively to any work environment.

EXPERIENCE

Developer Intern — Viiworks

April 2025 – July 2025

- Assisted the IT department in developing and maintaining websites and internal tools using HTML, CSS, JavaScript, and PHP.
- Supported debugging tasks and contributed to UI improvements.
- Collaborated with designers on website creation.

TOPCIT (Test of Practical Competency in ICT) — Participant

2023

- Participated in the global ICT competency assessment program under Makati Science Technological Institute of the Philippines (MSTIP).

PROJECTS

Sweet Heart Treats Cafe — POS and Inventory System

- Developed a desktop-based Point of Sale and Inventory Management System using Java NetBeans to improve sales tracking, inventory monitoring, and reporting.

Your Neighbor's Cafe — Online Reservation Management System

- Designed and developed a web-based reservation platform allowing customers to book tables online while enabling administrators to manage reservations efficiently.

Comet Transportation Cooperative — Auto Parts Inventory Management System

- Built a comprehensive inventory system for tracking auto parts, stock levels, supplier information, and inventory transactions.

Web-Based Inventory Management System with Stock Analytics

- Created a business inventory solution featuring real-time stock monitoring, analytics dashboards, inventory forecasting, and detailed reporting capabilities.

Byte Sales Wholesale — Online Ordering Management System

- Developed an online ordering platform that simplifies order processing, customer management, and sales tracking for wholesale operations.

Atlas Bouncer Services — Payroll Management System

- Designed a payroll solution that automates salary computation, attendance tracking, deductions, and employee payroll reports.

Integrated Barangay Payatas B Information Management System

- Developed a centralized information system for managing resident records, certificates, and reports.

Kristel's Cakes and Pastry — Online Store System with Real-Time Order Tracking

- Built a complete e-commerce platform featuring online ordering, payment integration, inventory tracking, and real-time order status updates.

SEMINARS & WEBINARS

- Free Claude AI Webinar — Goodman Tech (Online & Singapore-hosted)
- AI for Marketing Workshop — hosted with DICT, Sea Innovators, and USA-based company

ACHIEVEMENTS

- BSIS President, 2022 – 2025
- BSIS 4th Year Representative, 2025
